

Sentry Products Lead the Way in Molecular Nanotechnology and 21st Century Innovation.

Sentry is a distributor of next generation coatings and sealants leading the way in 21st century innovation. Using current nanotechnology, our product line covalently bonds at a molecular level with substrates rather than merely adhering to them as competitive products do. The result is a surface that is:

1. Eco-friendly/Environmentally Safe

- Made with organic, natural materials
- Low or zero VOCs
- Passes all EPA regulations and requirements
- Surpasses AQMD requirements

2. Cost-effective

- A single component, single coat system
- Outperforms competitors in initial capital outlay, ongoing maintenance costs and asset longevity
- Applied in a very thin layer, reducing costs since a little goes a long way
- Ideal for historic buildings that can't appear "sealed"

3. 100% UV stable

- Adds a layer of protection to paint
- Slows deterioration and fading
- Will not be adversely affected by UV ray exposure

4. Long-lasting

- Extends the life of equipment, machinery, buildings and civic landmarks
- Effective corrosion mitigation
- Takes nanotechnology to new levels of performance
- Protects assets for years
- Backed by a limited warranty

5. Durable

- Sc39.11 on the ASTM Taber Abrasive test
- 70-75 on the Rockwell Scale
- 7-7.5 on the Mohs Scale.
- A diamond is 100 on the Rockwell Scale and 10 on the Mohs
- Highly resistant to normal wear and tear
- In most circumstances re-application will not be required for years.

6. Easy to apply

- Minimal cleaning preparation needed
- No need for pre-application stripping
- Use of minimal product speeds application
- Dry to the touch in two–three hours
- Fully dry in less than five hours
- Fully cured in seven days
- In damp climates, it's unnecessary to wait for clear weather to apply
- One-pot systems are ready for shaking, opening and immediate application

7. Easy to maintain

- Water and mild cleaners keep surfaces in pristine condition
- Significant reduction in maintenance costs such as polishing floors in supermarkets, malls and hospitals
- Reduces ongoing cleaning and maintenance costs

These short videos will help you learn how Sentry Coating's and Sealants line of products are used in day-to-day applications and what can be accomplished using each product. By seeing how our different products are applied in real-world challenges and how they can be used to solve everyday problems, you'll gain an understanding of how the Sentry line can help you preserve and protect your property.
