

INDUSTRIES

Sentry Coatings can be applied to nearly any surface. Due to this fact, the potential industries are limited only by the imagination. Far from an exhaustive list, the following industries are some of the major ones that our technology has gained significant traction in.

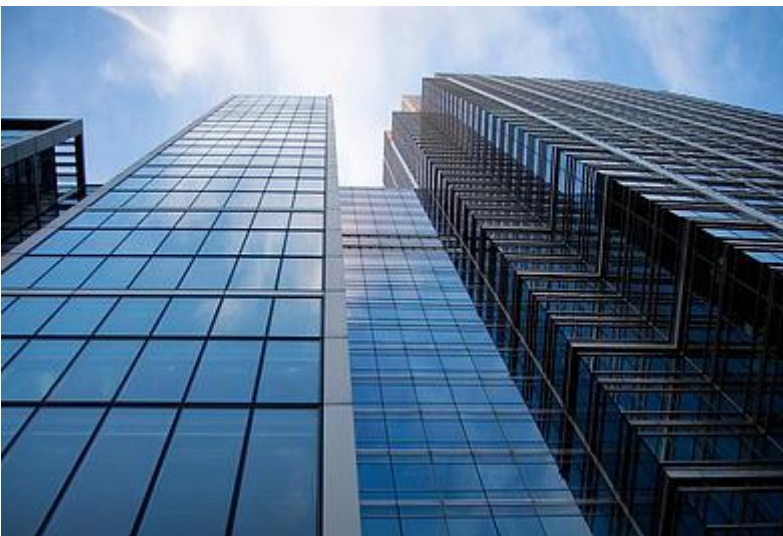

RESIDENTIAL PROPERTY

Protect and preserve both inside and outside residential property. Surfaces or objects that can be coated include:

- Decks and porches
- Fences
- Outdoor furniture
- Pool Areas
- Painted or wallpapered walls
- Sidewalks
- Carpet, wood or vinyl flooring
- Windows and glass surfaces
- Countertops
- Many other porous or non-porous surfaces

COMMERCIAL PROPERTY

Significantly reduce maintenance or replacement costs by protecting and preserving your business' assets. Uses include:

- Protecting surfaces against vandalism such as graffiti
- Greatly reduce window cleaning costs with self cleaning glass coat
- Protect and preserve signs and advertisement from environmental wear
- Reduce costs of maintaining sidewalks, walls, or other publicly visible spaces

INDUSTRIAL

Sentry Coatings technology protects machinery and other industrial equipment from harsh environmental conditions and corrosive chemicals. Protect your industrial assets from:

- Environmental Corrosion
- Chemical corrosion
- Oxidation
- Rust

PUBLIC SPACES

Preserve the aesthetics and enhance longevity of areas for public use and enjoyment. Our technology will protect:

- Monuments
- Walkways
- Playgrounds
- Natural stone areas or structures

TEXTILE

Sentry Coatings technology works very well with textiles while remaining invisible and being safe to wear. Protect textiles from:

- Stains from food or liquid
- Stains from oils and greases
- Sun damage
- Flame

AUTOMOTIVE

Protect your vehicle's interior as well as exterior from UV damage, scratches, and water spots as well as restore the original color to like new condition. Parts that can be applied to include, but are not limited to:

- Tires
- Dashboards
- Interior or exterior plastic
- Trim
- Body of vehicle
- Leather seats
- Truck beds

MARINE

Our technology will protect your commercial or recreational ship or boat as well as any marine structures or machinery including off shore rigs, boat docks, and beachfront property from:

- Marine fouling (Growth)
- Oxidation
- Rust
- Saltwater corrosion

ELECTRICAL

Prevent your electrical equipment from water or high humidity damage. Electrical equipment could include:

- Cell phones
- Computer parts
- Circuitry
- Cameras

PAINT

Transform normal paints into high performance, high endurance super paints with our revolutionary paint additive.

To see all the benefits our paint additive can provide, see our [Additives Page](#).
